**DETAILED ACTION**

**Status of the Application**

Acknowledgement is made of the receipt of the IDS filed 12/28/01.

Claims 1-20 are pending. Claims 1-20 are subject to an Election/Restriction requirement.

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16 and 19-20, drawn to a method for treating gastroesophageal reflux disease, which comprises administering a therapeutically effective tissue bulking amount of biocompatible hydrophilic microparticles, classified in class 424, subclass 489.
- II. Claims 17 and 18, drawn to a sterile injectable solution suitable for treating gastroesophageal reflux disease, which comprises (a) biocompatible hydrophilic cationic microspheres and (b) autologous cells, classified in class 424, subclass 422.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention:

Election of Coating:

- (I) Coating with autologous cells.
- (II) Coating with at least one collagen (or a derivative thereof), glucosaminoglycans (or a mixture thereof).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
